PROJECT NAME**Timesheet App****STARTED AT ENDED AT****JUL 2024 JUL 2024****PROJECT DESCRIPTION**

Application used to submit trainer overtime by one of the famous bootcamps in Indonesia. This project is made using Angular as the frontend and Go on the backend

PROJECT NAME**YChatApp****STARTED AT ENDED AT****AUG 2024 AUG 2024****PROJECT DESCRIPTION**

Personal project that carries a chat application similar to WhatsApp. This project is made using Flutter as the frontend and Go as the backend, then there is Socket.io as a web socket

PROJECT NAME**Company Landing Page with Web Admin****STARTED AT ENDED AT****SEP 2024 SEP 2024****PROJECT DESCRIPTION**

This landing page is not like a landing page in general, for the client's flexibility to change data without having to change the coding, a web admin is provided to make it easier. This application was ordered by PT. Nihon Chemical Indonesia. This application is built with fullstack Laravel

PROJECT NAME

Maintenance Management System (MMS)

STARTED AT ENDED AT
SEP 2024 NOV 2024

PROJECT DESCRIPTION

This project is intended for companies that have factories and want to implement industry 4.0. As the name implies, this application is used by factories to simplify the maintenance process of their machines. So far, there have been 3 clients who have ordered and customized this application, namely Sharp, Sinar Meadow and Tricentrum Fortuna. This application is built with Express Typescript with DDD pattern and React Typescript frontend then mobile Flutter.

PROJECT NAME

TryOut System App

STARTED AT ENDED AT
OCT 2024 ON
PROGRESS

PROJECT DESCRIPTION

This application is my personal digital product that I target to reach the production stage in February 2025. I created this application to capture the market of CPNS, SNBT and civil service fighters. This application is built using Golang on the backend and ReactJS on the frontend.
